The simple and effective geolocation solution to protect wandering patients

EASY INSTALLATION

Fast and standalone, the infrastructure deployment is cable free with no extra work and expandable according to your coverage needs indoor & outdoor.

TOTALLY RELIABLE

Locate your patients 24h a day using a wearable tracker managed by a fault-tolerant, secure and remotely administered infrastructure.

COST EFFECTIVE

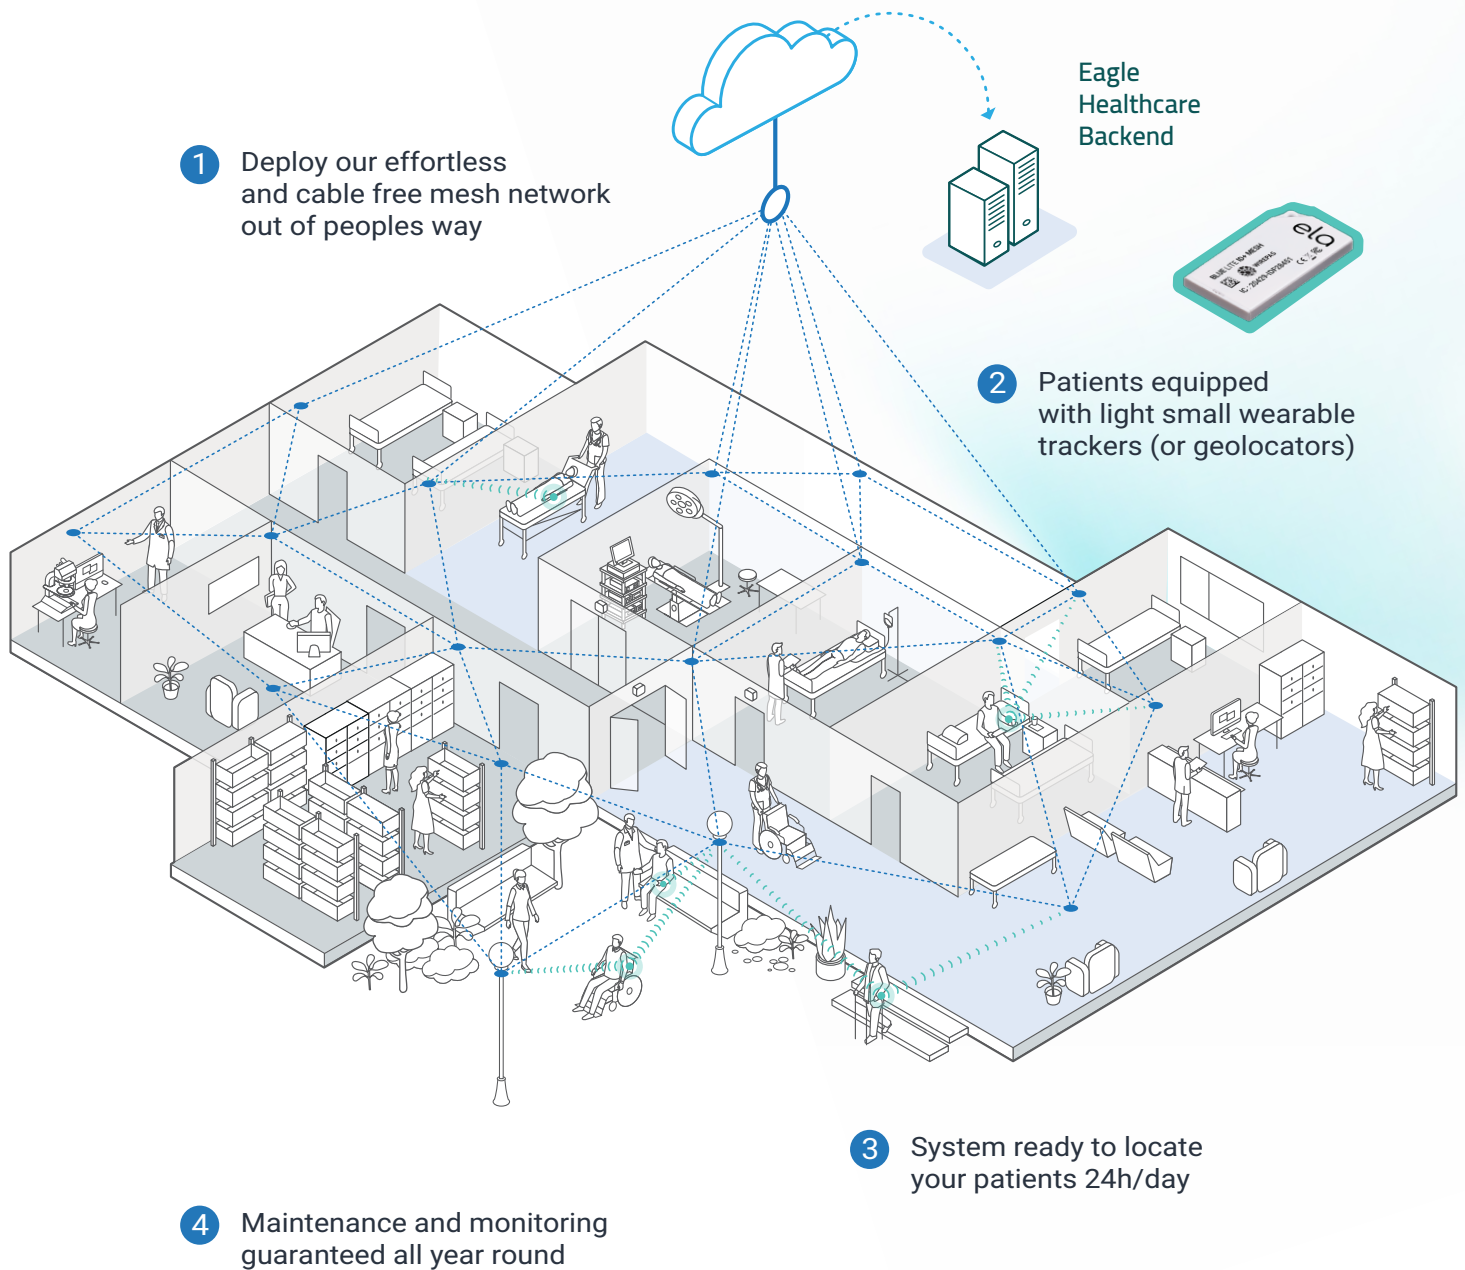

Attractive installation and maintenance cost. Our solution guarantees excellent ROI and high standard of quality services for your business.

“ Over the years, a close collaboration has been established between our teams and OnYourMap, whose expertise in geolocation and IoT technologies has enabled the solution to evolve to our needs, helping to improve the workplace of nursing staff. Working with a partner that can listen carefully and support our specific key requirements was key in our healthcare ecosystem. ”

Christophe Chaillolleau, Hospital Group Hospitalier HENRI MONDOR
